

# ATLAS/AES-Cockpit for SAP®-Systems

**Do you deliver products abroad?**

**Are you looking for an SAP® integrated system to handle your export transactions?**

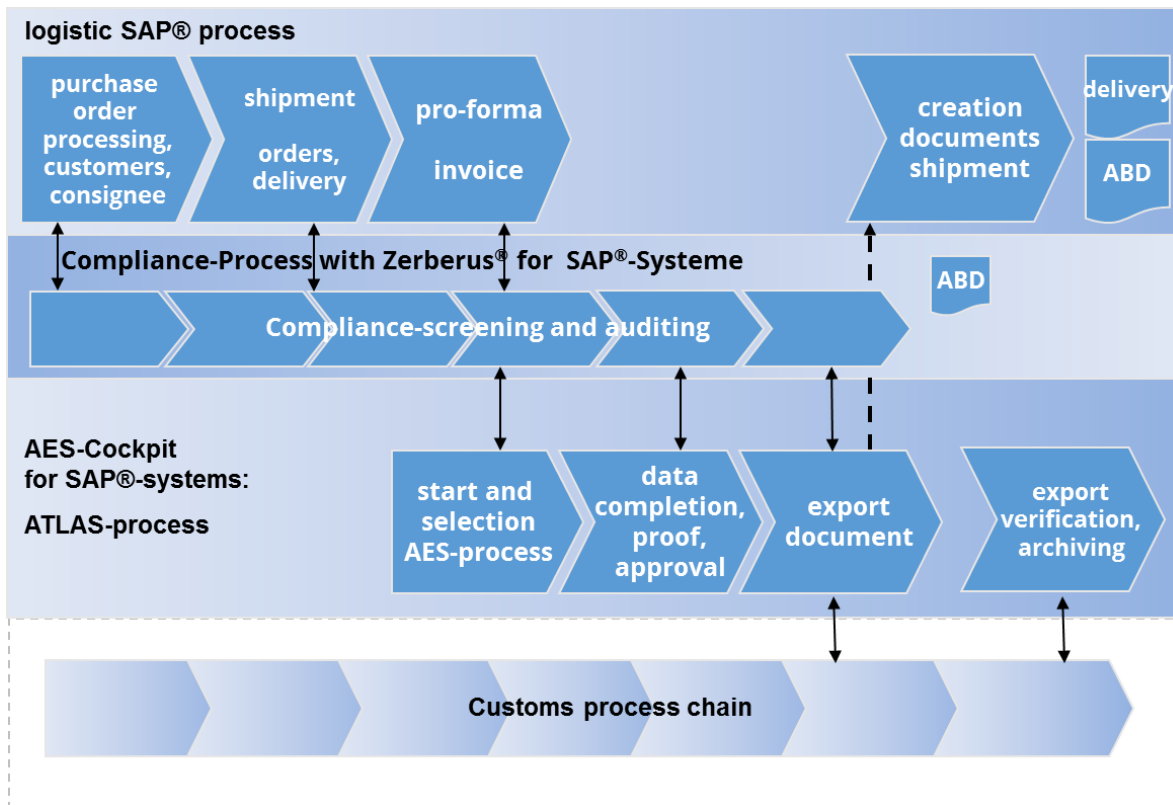

For some years exports have been made electronically in Germany. The processes are now familiar, so that companies can now turn to process optimization.

The focus of the CSF Group is currently on the permanent optimization of the processes and functions of our ATLAS / AES cockpit for SAP® systems in order to even better serve the needs of our customers. Essential points are the optimization of the message exchange (ATLAS MX), the improvement of the user friendliness as well as the increase of the system stability and security.

With the ATLAS / AES cockpit for SAP® systems, the CSF Group offers you an attractive solution for implementing the electronic export procedure "ATLAS".

## Functionality

Secure export processes require consistent links for all relevant process steps in the logistics chain. The following diagram shows the picture of an integrated process map embedded in the ATLAS AES cockpit for SAP® systems.

In the ATLAS / AES cockpit for SAP® systems, you manage all export-relevant data in one central location. Each process can be edited directly from within SAP®. Due to the full integration, all functions for master data and transaction data in the SAP® environment can be used.

The following figures show the area menu, the customizing for each customer as well as the exemplary creation of an export declaration.

## Our services

- Full integration of the ATLAS / AES cockpit for SAP® systems into the SAP® logistics process landscape
- Customizing functionality for the customer-specific setting of the ATLAS / AES cockpit for SAP® systems
- Reporting programs for evaluations
- Status tracking with traffic lights and automated mail alerts
- Audit-proof detection system in the SAP® system
- Secure and fast data exchange between the ATLAS / Cockpit for SAP® systems and the certified customs data clearing company Blujay Solutions
- Ensuring emergency scenarios through alternative procedures
- Practice-oriented advice
- User documentation and training
- Support during commissioning

## Your benefit

- The user can continue working in his familiar SAP® environment in the ATLAS / AES cockpit for SAP® systems
- The comprehensive status management in the ATLAS / AES cockpit for SAP® systems provides information about the current processing status for each export process
- All foreign trade / export issues are logged and documented in SAP® and can be viewed at any time, e.g. within the framework of customs inspections
- Fully Integrated Boycott Lists Checking Provides Protection Against AWG Violations and Assistance in Being an Authorized Economic Operator
- ATLAS MX Monitoring allows the department to quickly and easily find faulty or untransmitted messages using a clear list, using a traffic light function
- With ATLAS MX, the department does not depend on responsible supervisor of the communication platform, but can independently look into the process

## **What else distinguishes us ...**

Due to our many years of experience in the area of foreign trade law, the safe handling of sensitive data is a matter of course for us. With us you rely on a practice-oriented implementation in your company!

## **Distribution**
