

## Functionality

The CSF Group offers you an extension for your ATLAS / AES cockpit in the familiar SAP® work environment. This makes it easier for you to encode the documents in your export declaration and suggests the appropriate coding for a particular product number depending on the country of destination.

An automated process generates a file daily from the EZT information provided by the EU, for your ATLAS AES cockpit, which is loaded into the SAP® and supports you as a user in document coding in the established processes.

Data service and import of EZT tariffs:

The screenshot displays a software interface titled "AES Import TARIFE". On the left, there is a partial view of an email or document with the CSF logo and the text "Informationen zu Atlas AES". The main part of the interface is a form with the following sections:

- Datenlieferant (Herkunft)**: Radio buttons for "CSF Content Network" (selected) and "Bundesanzeiger".
- Optionen für Import CSF Content Network Daten**:
  - Dateiauswahl**: Two input fields for "Datei Frontend" and "Datei Appl. Server".
  - Steuerung**: Checkboxes for "Detailliertes Logging" and "Testlauf".
- Filter für Bescheinigungserfordernis Daten**: Input fields for "Statistische Warennummer" and "Unteragentyp", each followed by a "bis" field and a range selection icon.

The EZT Online contains i.a. the import and / or export control of certain goods (e.g. dual-use goods), monitoring of imports and exports, the EU codes for documents that are to be provided, certificates and authorizations which have to be stated in box 44 of the Single Administrative Document (SAD) and the list the country codes used in the different fields of the SAD, in accordance with the list of countries and territories published in Regulation (EU) No. 1106/2012.

Here are the EZT integration in the export notification with measures and conditions:

The screenshot shows the ATLAS AES Cockpit interface for creating an export notification. The main window displays a table of EZT (Export Zertifikat) data. The table has columns for 'stat.Warennummer/Typ/Id/Art', 'T/N (Icon)', 'Art (Text)', 'Beginn', 'Ende', 'Gebiet', 'Fussn.Id', 'Fussn.art', 'Fussnotenart (Text)', 'Fussnot. Beginn', and 'Fussnot. E...'. The data includes multiple rows for 'Ausfuhrge...' with various Fussn.Id and Fussn.art values, and one row for 'Die Anmel...'.

Below the table, a detailed view for a specific measure is shown:

ITyp: Massnahme  
 ID: 0326  
 Art: 478  
 Beginn: 06.03.2013  
 Ende: 12.06.2016  
 Ausfuhrgenehmigung (Dual use)

Fussnotenart: DU Güter mit doppeltem Verwendungszweck  
 Fussnote: 063  
 Fussnot. Beginn: 04.12.2006  
 Fussnot. Ende: 01.01.4000

Waren der Nummer 1C010 der Liste der Güter mit doppeltem Verwendungszweck.

The daily transmission of EZT data via an electronic network ensures the prompt and correct information of the national administrations of Member States. The EZT database is available on the website for online queries and in Excel format for automated queries.

An automated process generates a file for your ATLAS AES cockpit daily from the ECA information provided by the EU, which is loaded into the SAP® and supports you as a user in documentation coding for the established processes.

Example of EZT assumption in the document area:

The screenshot shows the ATLAS AES Cockpit interface for creating an export notification, focusing on the document area. The main window displays a form with fields for 'Faktura', 'AES Nummer', and 'Belegart'. The 'Faktura' field contains the value '90034460'. The 'AES Nummer' field is empty, and the 'Belegart' field contains the value '230 ATLAS 2.3 Ausfuhranmeldung unverdichtet'. The 'MRN' field is empty. The 'Int. Status' field contains the value '00 erfasst, änd'. The 'Zollstatus' field contains the value '0'.

Below the form, a table of 'Lieferung' data is shown:

Lieferung	Pos.	Typ	Q...	Unterlagenreferenz	Unterlagenzusatz	Detail	Aus.dat.UL	Gült. UL
80013301	10	X002						
80013301	10	Y901						

## Our services

- Practice-oriented advice
- System integration into your existing SAP® system landscape
- User documentation and training
- Support during commissioning
- Addon extension for ATLAS / AES cockpit
- Updating the EZT information

## What else distinguishes us ...

Due to our many years of experience in the area of foreign trade law, the safe handling of sensitive data is a matter of course for us. With us you rely on a practice-oriented implementation in your company!

## Distribution

For sales questions about the products, solutions and services of the CSF Group, please contact CSF Industry Consulting.
