

Supplier declaration monitor (LEMO) for SAP[®]-Systems / LE-Online portal

You want a clear and user-friendly solution for monitoring and managing your supplier declarations for your company?

By increasing cross-border trade relations and reducing international trade barriers, the number of bilateral and multilateral preferential agreements is steadily increasing. If products and merchandise meet the requirements of the legislator, there is the possibility of applying preferential rates of duty. This substantiates in a duty-free or reduced tariff for importing goods into the country of destination.

Prerequisite for the preference capability is a supplier declaration (LE). It represents the proof of the preferential origin of a good provided by the exporter. In order to make best use of the opportunities arising from this structural change for your company, the CSF Group offers you a modern, fully integrated and powerful software solution for the automated management and creation of supplier declarations with the LE monitor for SAP[®] systems in conjunction with the LE-Online portal.

Legal background

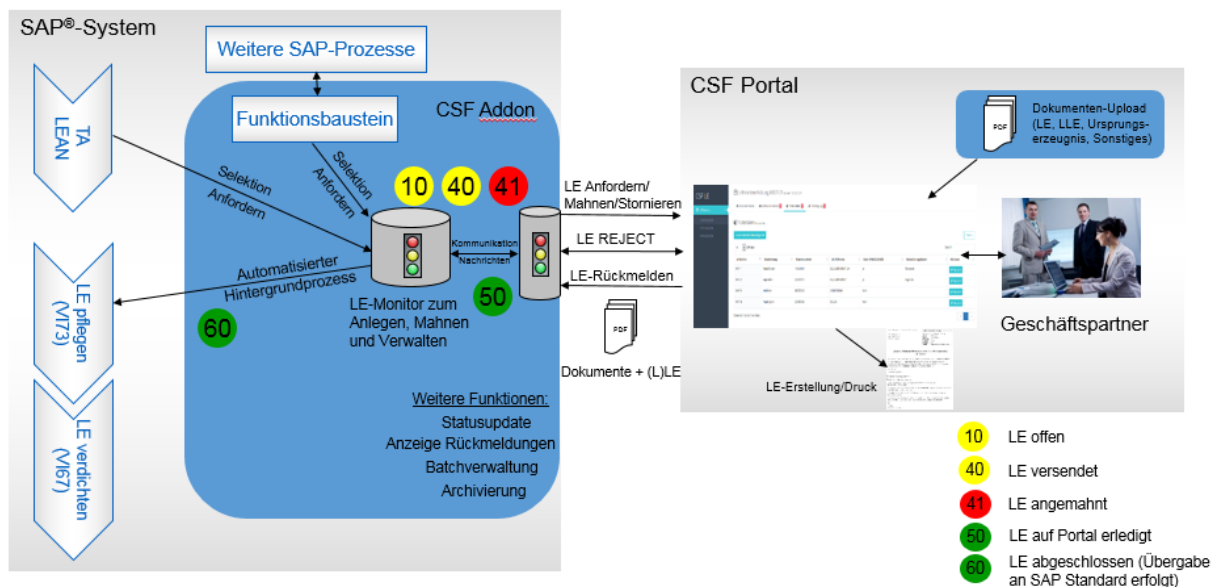

With the inception of EU Implementing Regulation 2015/2447, significant changes to the Long-term Supplier Declaration (LLE) in accordance with Articles 61 to 66 will take effect. This results in additional administrative effort for companies.

Structured and computer-aided monitoring of supplier declarations is therefore gaining importance in order to minimize the costs for the preferential processing issue in companies.

Functionality

Viewing the preferential issue form a legal point of view, the supplier declaration serves as the crucial information and verification document for the supplier to give information regarding the preferential origin of the delivered goods. However, the process of requesting by print or e-mail, and especially the management of the LEs is associated with considerable manual effort today.

This is where our LEMO comes into play. It supports you when requesting LEs in the SAP® system:

With LEMO, you have the opportunity to proactively manage supplier declarations and thus benefit from a competitive advantage. A decisive advantage of our solution is that the suppliers' feedback regarding their preferential situation is transferred and booked fully automatically via a background process into to the SAP® standard (info records). If a valid declaration is missing, it can be dunned or requested again automatically for repeated revision. Depending on the configuration of the batch program, this will occur at specified tolerance days:

This solution is completed with our LE online portal, which optimally supports your suppliers with optimized web forms by means of pre-assigned SAP® data (preference zones, supplier data, tariff number, country of origin, etc.) for quick and uncomplicated delivery or provision. Fast assessment and far-reaching plausibility checks provide suppliers with improved process quality and convenience when entering data on the LE online portal. Even documents such as certificates of origin can be easily uploaded and automatically transferred to the SAP® system. The automated feedback of data and documents to the SAP® add-on for supplier declaration and, above all, the automated background process which saves the supplier data directly into the SAP® standard, ensures process optimization and -security and relieves your employees from the time-consuming activity of filling info records with the paper feedback data manually, item by item. Convenient traffic light functions for clear overview and effective monitoring complete the entire solution.

Our services

- SAP® add-on for supplier declarations in CSF's own namespace
- Provision and operation of an LE online portal for supplier declarations
- Managing supplier declarations (LEMO) with interfaces to SAP® standard features (request, maintain, compress)
- Master data function for the distribution of LEs
- Customizing functionalities in SAP® (contact persons, text modules, etc.) as well as configurable LE online portal (logo, user-defined fields, table contents)
- Easy LE online portal access via a single link for suppliers
- Convenient batch program with configuration options for automated LE processes (sending, confirming, dunning, etc.)
- Bidirectional interfaces for connecting LE online portal based on latest communication technologies (Universal Connector Monitor)
- Upload feature for different transaction types (e.g. originating product)
- Inquiry / change function via REJECT command
- Color highlighting changes made by suppliers on the portal side with the possibility of automated transfer of master data via individual BAdI implementations
- Automated background processes for directly transferring the preference situation into the SAP® standard (info records)
- Document linking and archiving in the SAP® system
- Practical advice on the introduction of preferential calculation in the SAP® standard

Your benefit

- Increased process reliability through automated and verifiable processes
- Avoidance of media discontinuities and associated transmission errors due to the full integration of the solution into SAP®
- Convenient and automated generation of supplier declarations from the SAP® standard ordering process, guaranteeing correct preference proofs during the delivery
- Shipping of supplier declarations at the push of a button or by batch directly from the SAP® system
- Individual addressing of suppliers (mail text) via SAP® default text modules possible and flexibly changeable at any time

- Automatic reception, assumption of supplier responses into the SAP® standard and revision-compliant saving of LE documents in the SAP® system (link to SAP® objects)
- Saves time by editing via pre-set web-based forms
- Reduction of rework, thus increased process reliability due to high quality of returns through implemented plausibility checks in the LE online portal
- Automatic tracking of processes and automated reminders
- Low training costs due to the familiar SAP® environment
- Created technical basis for mapping further supplier processes
- No need for a software installation for the supplier as only a current browser is needed

What else distinguishes us ...

Due to our many years of experience in the area of foreign trade law, the safe handling of sensitive data is a matter of course for us. With us you rely on a practice-oriented implementation in your company!

Distribution

For sales questions about the products, solutions and services of the CSF Group, please contact CSF Industry Consulting.

Mail: info@ic.csf.de
