

Zerberus[®] Webapp for mobile devices

Do you know which business contacts you might encounter on business trips, exhibitions, etc.? Do you want to minimize your liability risk? Would you enter into a business relationship with terrorists or terrorist groups?

Legal background

The EU has responded to the attacks of September 11th 2001 by reforming the German Foreign Trade Act, and dealing with so-called terrorist groups and those related to them. Offenses are punishable by fines or imprisonment.

Likewise, the US also has sanction lists that must also be complied with by countries that are in business with the USA. If these regulations are disregarded, a trade embargo threatens.

In addition, issuing the AEO certificate for companies requires compliance with legal regulations.

The CSF Group offers you numerous sanction lists for your business partner screening to comply with the anti-terrorism regulations.

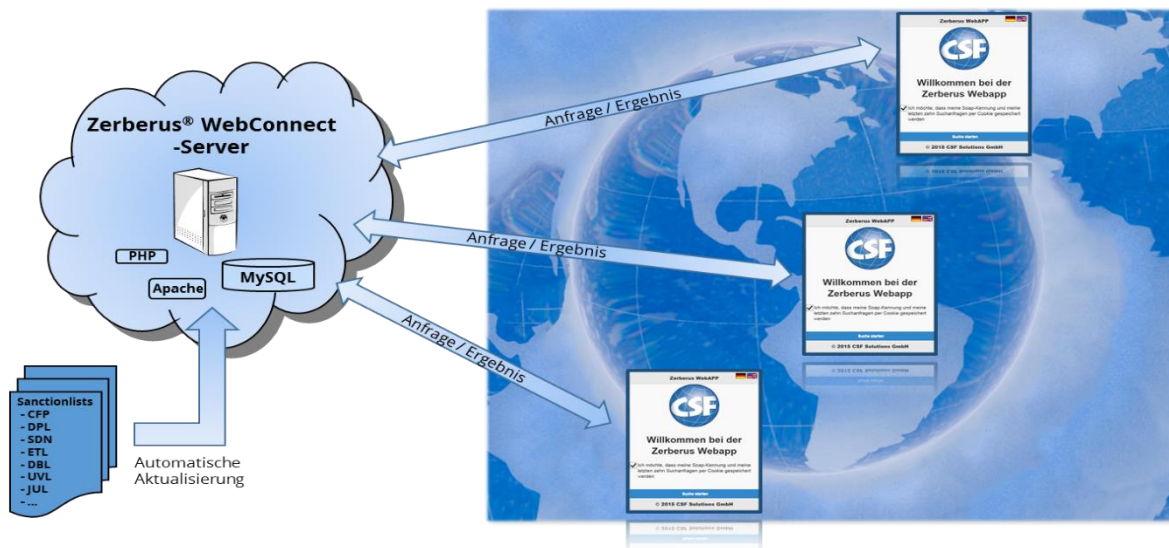

Which business divisions are affected?

Since the subject of compliance has become more important for some years now, we can now also offer the mobile worker and smaller companies the right solution.

With the use of our Zerberus[®] Webapp for mobile devices, integrated into our product Zerberus[®] Webconnect, you secure your company in areas such as purchasing, sales, finance, IT, security, export and human resources easily and efficiently.

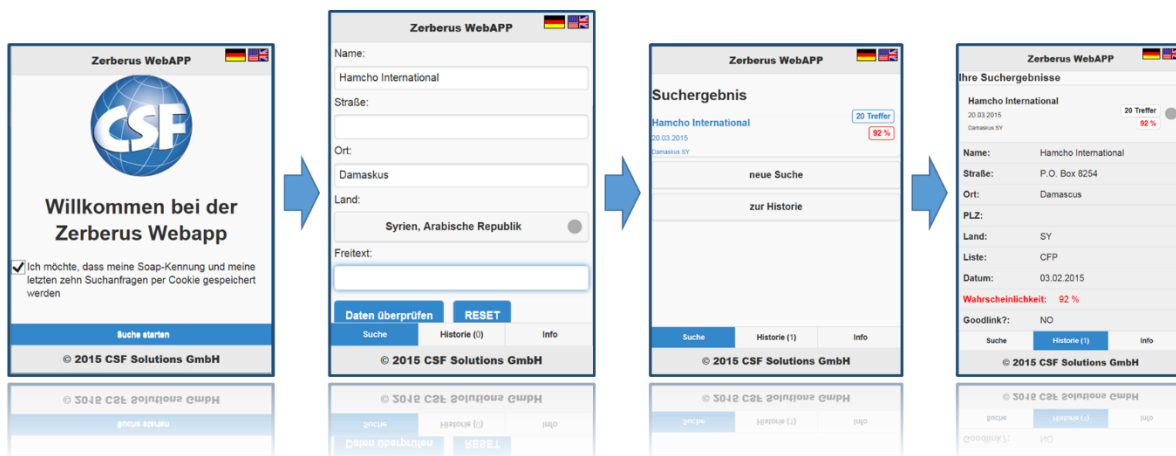

Already during business initiation at trade fairs or field sales, you can always use our Zerberus[®] Webapp to determine the current status of your business partners.

The following diagram illustrates the functionality of Zerberus® Webapp for mobile devices.

Our solution

You can use our application on all major mobile devices, anytime, anywhere. All search requests are documented and archived.
